SUMMARY

Full-stack developer focused on clean architecture and real-world impact. I modernize legacy frontends into React apps, design backend systems in Go and Node, and create tools to enhance developer efficiency. I enjoy solving diverse problems across the stack with sustainable code.

WORK EXPERIENCE

Full-Stack Developer Infosys (Client: Bank of America)	Nov 2025 – Present
<ul style="list-style-type: none">Migrated a legacy banking app from jQuery/vanilla JS to modular React.Improved the Java Spring Boot backend with new REST APIs, enhancing responsiveness by 15%.Implemented a phased migration strategy to ensure no disruption to live banking operations.Established modern tooling (Webpack, Babel) and a UI component library for better maintainability.	
TypeScript Microservices SDK (NPM SDK)	Jan 2024 - Present
<ul style="list-style-type: none">Developed monorepo of 6 npm packages for Node.js/microservices development.Enforced architecture patterns including barrel exports and dual ESM/CJS builds.Integrated Biome for formatting and strict import/export rules.Packages reduce boilerplate and accelerate production service development.	
PDF Processing Engine (Go, Node, Python, gRPC, MongoDB)	Feb 2025 - Oct 2025
<ul style="list-style-type: none">Built a Go service using iLovePDF API, reducing file size by 70%.Created a Python service to convert PDFs into interactive HTML using AI for better accessibility.Engineered a concurrent Go processor to transform PDFs into XOD format, automating workflows via FTP/cron.	
TubeSpanner Browser Extension (JS, React, RxJS, webpack)	Jan 2024 - Jan 2025
